## Compuprint Mobile Printing Router Ai 5

*Wireless printing with mobile devices like smartphones, tablets, and notebooks on Compuprint impact and non-impact printers*

*Your employees use mobile communication or data capturing devices like smartphones and tablets and shall be put in a position to print in all subsidiaries without being obliged to log into the particular local network?*

*You would like to offer visitors and guests the comfort to print just updated documents or any information they need for a conference at a push of a button without looking for getting a helping hand on using the company network or getting connected to a local printer?*

*As a carrier you would like your drivers getting enabled to print on the move updated pick up orders which you have sent on air at their mobile data capturing device? Your advantage are reduced empty trips, an increased productivity and satisfied customers due to your optimal short reactiontime.*

*All these opportunities offer the **Mobile Printing Router Ai 5** from Compuprint. As a WLAN-router it receives the print data from mobile devices which support printing and transfers them into the fitting printer language before sending them by ethernet or USB to the chosen printer. Both the AirPrint function from Apple and the printing function of Android are supported.*

## Compuprint Mobile Printing Router Ai 5
