

# Environmental Policy

GDS Group recognizes its responsibility towards the environment and is committed to continuously improve its interaction with it.

The Company will conduct its activities in the following ways:

- 1) by respecting the relevant regulatory and legislative requirements and, wherever possible, exceeding these requirements;
- 2) by striving to incorporate environmental objectives into business decisions, taking into account factors such as new technology, new equipments and recycling initiatives;
- 3) by minimising the consumption of energy resources, increasing the efficiency of plants and equipment and properly sorting and reducing the waste materials;
- 4) by preventing risks to the environment caused by polluting releases, accidental spillage and the usage of hazardous substances.
