*Compuprint SPK40*Plus
Self Service Passbook Printing Kiosk
Efficiency in the banking branch

*Compuprint SPK40*Plus
Self Service Passbook Printing Kiosk

Cost Saving advantages vs Auto Turn-Page Passbook Kiosk

Time saving:
Efficiency in the banking branch reducing queues and customers waiting time, more personnel productivity

Passbook cost saving:
Standard passbooks can be used instead of expensive "quality" passbook used with Auto Turn Page Passbook kiosk (**Millions of US$ saving per year**)

Costs saving:
- 50% cost reduction compared to Auto Turn Page Passbook Kiosk
- Low cost of maintenance, cost per page and energy consumption
- High reliability due to simple passbook printing mechanism (less passbook jams and waste of passbook pages/stationery

- Ticketing

➤ Print Speed: from 4 to 10 ips
➤ Print Width: from 2″ to 6″
➤ Resolution: 203-300dpi
➤Print method : Thermal Transfer / Direct Thermal

Genuine Consumables

Compuprint consumables produces the best result from our printers. The use of compatible consumables could significantly reduce print quality and the possibility of abrasive inks can shorten the life of the printer and may effect the warranty. Compuprint provides original consumables for its printers to ensure an excellent printing quality, indelibility and longest printer life. The genuine consumables are manufactured under Compuprint specifications and the quality has been checked and controlled from raw materials (**toxic free**) to customer's door. Like the printers, also the original consumables comply with the strict ISO 9001 quality standard (Health Care rules too). Original Compuprint ribbons are recognizable by the Compuprint hologram applied on the consumable body.
